DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

That of figure 1, that of figure 2, that of figure 3, that of figure 4, that of figure 5, that of figure 8, that of figure 12, that of figure 15, that of figure 19 and that of figure 20.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Figure 1, claims 2 and 3; figure 2, claims 2 and 4; figure 3, claims 2, 3, 5 and 6, figure 4, claims 2, 4, 5 and 7; figure 5, claims 8 and 9; figure 8, claims 8 and 10; figure 12,

Art Unit: 3617

claims 8, 9, 11 and 12; figure 15, claims 8, 10, 11 and 13; figure 19, claims 14 and 15 and figure 20, claims 14 and 16.

The following claim(s) are generic: 1.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: figure 1 discloses the steering device with a two way pump, two pressure detectors and a pressure subtraction circuit; figure 2 adds the motor current detector and a comparator circuit to what is shown in figure 1; figure 3 discloses the use of two two way pumps, two pressure detectors and a pressure subtraction circuit; figure 4 adds the motor current detector and comparator circuit to what is disclosed in figure 3; figure 5, discloses the use of a one way pump and a 3 position switch; figure 8 adds to what is disclosed in figure 5 with a motor current detector and a comparator; figure 12 discloses the use of one one way pump and two 3 position switches; figure 15 adds to what is disclosed in figure 12 a comparator and a motor current detector; figure 19 discloses the use of two one way pumps, pilot pressure lines and bypass check valves; and figure 20 adds to what is disclosed in figure 19 a motor current detector and a comparator.

4. A telephone call was made to William H. Holt on September 17, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
